DATA ANALYST

Data-driven Software Developer and Business Analytics graduate student with experience in automated learning, SQL, and data management. Proven track record of automating manual workflows and deploying user-facing tools serving 3k+ users. Combines technical engineering with analytical insight to solve complex technical problems and drive operational efficiency.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics, May 2027

North Carolina State University, Raleigh, NC
Bachelor of Science in Computer Science, 3.89 GPA, May 2026

AREAS OF EXPERTISE

Leadership | Problem-Solving | Attention to Detail | Adaptability | Database Management | Team Leadership | Experimental Design
Cross-Functional Collaboration | Technical Communication | Stakeholder Management | Supervision and Mentorship
Data Visualization | Data Mining | Statistical Analysis | Machine Learning | Business Acumen | Feature Engineering | Active Listening

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C, Spring Boot, React, Junit, SQL, R
Predictive Modeling & Statistical Analysis: Linear Regression (Lasso & ElasticNets), Logistic Regression (Lasso & ElasticNets), Time Series Analysis (ARIMA, G-Arch, Prophet), Clustering Analysis (K-means, DBSCAN, Hierarchical)
Machine Learning: Text Mining (NLP), K-Nearest Neighbors (KNN), Random Forest, XGboost, CatBoost, LightGBM
Data Analysis & Experimental Design: Exploratory Data Analysis (EDA), Experimental Design, A/B Testing
Analytical Software & Tools: MySQL, MATLAB, Desmos, GitHub, Eclipse, Cloud Technologies
Google Cloud (GCP): Colaboratory

PROFESSIONAL EXPERIENCE

OFFICE STAFF | **Wilderness Aware** | Buena Vista, CO June 2025 – August 2025

- Operated reservation management systems to process bookings and maintain accurate customer data.
- Handled high-volume email/phone inquiries with professionalism and clarity in a fast-paced environment.
- Maintained and automated inventory spreadsheets and reports, using Microsoft Excel and Office Scripts, saving 2+ hrs/week

CAMP COUNSELOR | **URJ Six Points Sci-Tech Academy** | Byfield, MA June 2023 – August 2023

- Assisted in programming and coding workshops, reinforcing technical learning for campers.
- Supervised and mentored groups of 8-13-year-olds, emphasizing teamwork and problem solving.
- Independently designed and led small group activities, demonstrating initiative and leadership.

PROJECT EXPERIENCE

NomNomNavigator | **Hack_NCState x Code Black Hackathon**: Built a nutrition app in 24 hours with a team of five, meant to scan barcodes and provide nutritional facts, as well as tally daily macronutrient intake. Developed frontend and connection to backend exhibiting problem solving skills and adaptability to new tools. Awarded Best Use of MongoDB Atlas by Major League Hacking.

Custom Colors for Desmos | **Chrome Extension**: Designed and published a Chrome extension that augments the Desmos Graphing Calculator with advanced color customization. Added a color picker and custom swatches to the color menu, facilitating users in the creation of aesthetic visualizations. Featured extension on the Web Store reaching 3k+ active users.

Math-Driven Games & Visualizations | **Desmos.com**: Created visualizations of statistical simulations, machine learning algorithms, and interactive games (e.g., Langton's Ant, Four-Dimensional Minesweeper) by pushing the limits of Desmos as a programming environment. Led a group project to create a detailed tutorial and guide that teaches creative uses of the platform, highlighting technical communication and team leadership skills.

EXTRACURRICULARS

Service Chair | **Alpha Epsilon Pi**: Organized and Planned multiple volunteering opportunities for 20+ members, strengthening chapter leadership and community engagement.
